SUMMARY

Computer Engineering student with strong skills in software development and web technologies. I have hands-on experience in creating innovative solutions through academic projects, internships, and hackathons, which have strengthened my problem-solving & teamwork abilities. My goal is to secure a Full Stack Developer position where I can continue to grow, apply my skills, & contribute to building impactful projects.

EDUCATION

- B.E. in Computer Engineering**
SVPMCOE, Malegaon
08/2023 - 07/2026
SGPA: 9.36
Baramati, Pune
- Diploma in Computer Engineering**
Government Polytechnic, Pune
08/2020 - 07/2023
Percentage: 83.6
Shivajinagar, Pune

SKILLS

- Languages: Python, Java, JavaScript, PHP, C++, SQL
- Framework & Technologies: Django, Spring Boot, AngularJS, ReactJS, Flutter, Flask, JavaFX, OpenCV, Bootstrap, Tailwind CSS,
- Databases & Cloud: MySQL, MongoDB, Firebase
- Tools & Platforms: Git, GitHub, Postman, Android Studio
- Soft Skills: Teamwork, Problem-Solving, Adaptability, Creativity

EXPERIENCE

- Sbris Tech**
Project: BiteTrack – Mess Management System
01/10/2025 – Present
Hybrid mode
Research & Development Intern
 - Developing a full-stack Mess Management System to automate daily operations including student registration, attendance tracking via QR code, and bill generation.
 - Implemented role-based access and real-time updates for admins and students using a secure database and dynamic dashboard for efficient mess administration.
- Bluestock Fintech**
Project: Company Finance Analysis
01/03/2025 – 31/04/2025
Online mode
Intern for Software Development Engineer
 - Worked on a financial analysis project involving data processing and visualization. Contributed to machine learning tasks such as model development and performance evaluation to support predictive insights in the fintech domain.
- Project: Belly Feast**
01/08/2025 – 31/09/2025
Hybrid mode
Intern for Software Developer and Team Lead
 - Currently contributing to the development and maintenance of a Food Delivery System consisting of two applications (Android & Web) using Flutter, Firebase & React.
 - Designed and implemented features across four modules: Admin Panel, Customer, Delivery Partner, and Restaurant.
- Web Stack Academy**
Project: Food Delivery Application
02/07/2024 – 16/09/2024
Online Mode
Intern for Web Development Using MERN
 - Developed a full-stack application using the MERN stack and Implemented features like user authentication, order tracking, Dynamic Sorting and menu management. Also the payment integration through Stripe and mail services through MailTrap and storage on Cloudinary.

Mentorship By Bharat Forge

Project: Activity Tracking Application in Industry

📅 01/12/2022 -01/ 04/2023 📍 Online mode
Mentee Under the guidance of Mr. Deepak Jaiswal

- Developed a staff activity tracking web application using Django, enabling efficient staff management and organization of company-related tasks.
- Integrated a credit score and reward system with redemption offers on a custom-designed shopping module exclusive to the platform.
- Implemented a hierarchical user structure to manage access control and operations based on employee roles and designations.

PROJECTS

SmartDesk – Employee Performance Evaluation

📅 07/2025 - Present

- Developing a desktop-based platform for employee tracking, performance evaluation & project collaboration with role-based access and Hiring System as a supplementary Service.
- Implementing facial recognition, AI-driven recommendations, & credit point rewards to enhance security and engagement.
- Building features like real-time chat, video conferencing, & scheduling using JavaFX, Spring Boot, Hibernate, MySQL, and Flask.

SoulSync - Organ Donation System Using PHP

📅 02/2025 - 03/2025

- Built a web app to facilitate organ donor & recipient registration, matching, and management with a role-based login system.
- Designed a responsive web with admin controls for user, & organ data management, ensuring secure access & efficient data handling.
- Implemented real-time donor–recipient matching algorithms to streamline allocation and reduce manual effort.

LANGUAGES KNOWN

- | | |
|-----------|----------------------------------|
| • English | Professional working proficiency |
| • Hindi | Full professional proficiency |
| • Marathi | Native or bilingual proficiency |

Dhrumi Technologies

Project: Food Ordering & Restaurant Booking System

📅 29/07/2022 -03/ 09/2022 📍 Online mode
Intern for Web Development

- Developed using Django, including features like user-friendly interfaces, a dynamic backend, and payment gateway integration for seamless transactions.
- Implemented separate categories for restaurants and hotels, allowing users to join as either, with a dedicated dashboard for each and ensured a smooth, bug-free experience by integrating core functionalities and optimizing performance.

Craft Fusion - E-commerce Shopping Website

📅 03/2025 - 05/2025

- Developed a full-stack platform using SpringBoot and AngularJS enabling users to register, browse, and purchase items, user authentication, role-based access, and dashboards for admin using JWT.
- Integrated payment gateways and ensured smooth transactions with a focus on performance, security and load balancing
- Implemented database management with MySQL, ensuring data consistency, faster queries, and seamless integration across modules.

DYTube – YouTube Clone Using Django

📅 02/2025 - 03/2025

- Built a web application replicating YouTube’s core functionality with features like video uploading, commenting, subscribing, search, and seamless notifications.
- Implemented user authentication and ensured a smooth user experience across all interactions.

TRAINING

- Java Full Stack Development Training organised in College
- Project Management Training Session organised By LPF
- Soft Skills Training organised by Cummins India.
